Subject: Microsoft Settlement

Hello. I do not think that this settlement is fair to companies who provide computers in the educational industry. This gives Microsoft the power to place any PC brand they want in the schools which means that they can give their allies a boost over there enemies in the educational arena. Apple Computer s Macintosh brand will be crushed by the Microsoft giant allowing them to gain even more power in the market. They must be broken up and have strict regulations placed on them. You must do this for the sake of innovation to create a better future for technology and man kind. Thank You.
